Summary

Full-stack developer with a Computer Engineering background, driven to build applications that solve problems meaningfully. Strong advocate for modular design patterns and performance optimization, ensuring systems scale gracefully. Believe in writing code that's as readable as it is functional, and enjoy partnering with teams to turn complex requirements into elegant digital experiences.

Education

Bachelors of Computer Engineering
Pokhara University, Pokhara

2019–2024

Projects

Chat App 🐙

- Developed a real-time chat application using the MERN stack, Socket.IO, and Tailwind CSS.
- Implemented JWT-based authentication and integrated Cloudinary for image storage.

Nutrition Tracker 🐙

- Developed a full-stack nutrition tracker using Node.js, Express, MongoDB, and JWT .
- Integrated Nutritionix API for real-time nutritional data.

foodBUDDY 🐙

- Built a dynamic food delivery web application using the MERN stack.
- Secured user accounts with JWT-based authentication, enabling users to search, and order meals implemented a scalable backend to manage food catalogs, orders, and profiles.

Library Management System 🐙

- Developed a Library Management System with CRUD functionality for book records.
- Designed robust backend to support efficient book cataloging and streamline user interactions.

Some JS games

- Chess game using chess.js
- Hangman game

Technical Skills

Languages: JavaScript, Typescript

Backend Development: Node.js, Express.js

Frontend Development: React.js, Tailwind CSS

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, VS Code, Postman
