EDUCATION

Bachelor of Computer Engineering 2019–2024
Pokhara University, Pokhara

School Leaving Certificate 2017–2019
SOS Hermann Gmeiner School Gandaki, Pokhara

EXPERIENCE

AWS & DevOps Training July 2026 – Present
AMCNSS IT Academy

- Currently enrolled in a training program covering Linux, GitHub, AWS Cloud Services, Terraform, Docker, Kubernetes, Jenkins, Ansible, Grafana, Prometheus, and Python.
- Building practical knowledge of cloud infrastructure, containerization, Infrastructure as Code (IaC), CI/CD workflows, and system monitoring.

PROJECTS

URL Shortener Service 🌐

- Designed and implemented a scalable URL shortening backend using Node.js, Express, and MongoDB with efficient URL resolution and analytics tracking.
- Implemented JWT-based authentication, rate limiting, structured validation, and database indexing for secure and performant API operations.
- Engineered click analytics with timestamp logging and usage tracking to monitor URL activity and support data-intensive workloads.

Subscription Management System API 🌐

- Developed a production-ready RESTful backend for subscription workflows with JWT authentication, bcrypt password hashing, and role-based access control.
- Designed a modular architecture with MongoDB and Mongoose to ensure structured data modeling, validation, integrity, and user-scoped access.
- Implemented asynchronous workflows for automated email reminders and background task handling, along with rate limiting for API robustness.

Real-Time Chat Application 🌐

- Built a real-time messaging system using Socket.IO with bidirectional communication, live user tracking, and secure client-server interaction.
- Implemented JWT-based authentication, protected routes, session handling, and structured API validation for secure application access.
- Designed MongoDB chat data models for efficient message storage and retrieval and integrated Cloudinary for scalable media storage.

TECHNICAL SKILLS

Programming: C, C++, JavaScript, Python (from training), SQL, Shell

Frameworks: Node.js, Express.js, React.js

Systems & Networking: Linux, REST API Design, Authentication Mechanisms

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, Postman, VS Code
